TRAY SEALING MACHINES & PACKAGING

Presentation

Attractive food display can help you maximise deli profits by stimulating impulse purchases and by allowing you to increase selling prices.

Ready To Go

We offer a range of tray sealing machines, food packaging and different payment options to help small businesses enter the profitable ready meal market with minimal investment .

Prep, Storage & Distribution

We are Ireland's premier supplier of tray sealing machines, disposable gastronorm food trays and lidding film for the healthcare market. Whether it be meals on wheels in the community, meals on demand in a nursing home, or bulk food storage and distribution in a large hospital, we have the products to suit. Contact Sales on 01-842 8888 for more information.

SEALING

Tabletop Sealing Machines From €495.00

IDEAL FOR MEALS ON WHEELS, TAKE-AWAYS

MF100 Sealer

Add a more professional finish to your food products with this simple, tabletop tray sealer. The MF100 machine seals trays of 164mm x 123mm or 145mm x 107mm, in a variety of depths up to 72mm. Manufactured to food industry standards, this machine requires only a normal 13Amp socket.

MF300 & MF600 Variosealers

These machines can be fitted with a range of different dies to suit the container you wish to use, up to a maximum size of 265mm x 190mm for the MF300 model and 340mm x 280mm for the MF600.

The trays are sealed with either a peelable film or a sealable (welded film).

The machine is switched on and the required temperature set on the regulator. When the temperature has been reached, the film - which is mounted at the back of the machine on the two support rollers - is pulled over the top of the tray to be sealed. The sealing head is then lowered by hand and pressed down to seal the film to the tray, at the same time the film is cut from the roll. The sealing head is then raised to the open position and the tray removed.

The MF300 & MF600 machines will work with all types of sealable food trays and films up to a maximum width of 190mm for the MF300 & 340mm for the MF600.

MF300

IDEAL FOR:
*** DELIS**
*** MEALS ON WHEELS**
*** BUTCHERS**

Product Features

- Adjustable or fixed temperature control
- Teflon coated sealing plate
- Stainless steel fabrication
- Twin reel film supports
- Simple, quick change die plates

Introducing iWave® Plated Meal Solutions

iWave® is a fully automated plated meal solution suitable for fresh, frozen and ambient foods that:

- Is very economical to run
- Has an Eco-friendly carbon footprint
- Provides a saving of up to 70% over conventional foodservice methods
- Can be tailored to meet your exact requirements
- Offers meals on demand so ideal for hospitals, long-term care facilities & canteens

To date over 4 million meals have been served using this system. To find out how the iWave® food service revolution can benefit your business, call Michael Flannery Catering Supplies Ltd now on 01-842 8888.

iwave®
AUTOMATED FOODSERVICE SOLUTIONS

iWave[®] saves energy, reduces utility costs, CO₂ emissions and saves on meal wastage costs

iWave[®] only uses energy when the product is being cooked. There is no warm up or stand by time. By replacing manual controls with a 'fool-proof' barcode scanner and unique encrypted barcodes, any chance of operator error has been removed, ensuring every meal is delivered at its best and only using the energy required to cook the product. iWave[®] is a table top system which operates off a standard 13amp plug supply. It is very economical to run, with an eco friendly footprint, providing a **saving of up to 70% over conventional foodservice methods.**

Carlisle Healthcare Meal Delivery System

DINEX | CARLISLE

INNOVATION FOR HEALTHCARE FOODSERVICE

THE ONLY INDUCTION SYSTEM TO MAKE YOUR WORK EASIER, FASTER AND SAFER!

SMART • THERM™ STS II INDUCTION CHARGER

The ideal Induction Charging System for room service, meal delivery, trayline and boosting applications.

- Senses Dinex Induction Base automatically and gives the correct amount of energy to get correct temperature every time.
- Microprocessor monitors vital components and runs a performance check on average of 120 times per second.
- Charger shuts off and displays error codes in plain text enabling user to diagnose or identify minor problems.
- Uses new, durable Dinex Induction Base.

HEATS BASES IN
14
SECONDS
AT 240v

Fluctuation in voltage may affect charging

INDUCTION BASE

The patented Induction Base features a built-in chip that relays information to the heating unit. This protects the base from overheating or excessive cycling, which causes system failures and downtime for the trayline. A built-in heat deflector minimizes heat loss through the bottom of the base.

- Durable construction.
- Maintains hot food temperatures up to 60 minutes.
- Uses electro magnetic energy to activate.
- Bases remain cool to the touch after heating.
- "SMART" chip gives feedback to the system to ensure consistent base temperature.

Calibration Service For All Food Probes

We have an experienced engineer on staff to calibrate your food thermometers, either in-house or on-site for large quantities.

We offer a fast and cost-effective service with a typical cost of just **€45 per probe**. However, we offer the following discounts for larger quantities: **€40 for 5 or more**, **€35 for 10+**, and price on application for larger volume, on-site calibrations.

Please telephone Sales on 01 842-8888 to book your calibration.

Stay HACCP Compliant
